

Call for an ImPact Coalition for implementing Reconciliation and Peace Education - as core competencies in World Education.

Call for action towards reconciliation, global health and universal peace

The Foundation for Subjective Experience and Research S.E.R., NGO in special consultative status with ECOSOC, associated with UN DGC, herewith introduces the following S.E.R. - Action Plan as a proposal for Peace achievement,

according to mainly Chapter 2: International Peace and Security of the Pact for the Future.

It provides a practical and action-oriented approach that ensures sustainable peace and conflict prevention, assuming that

Reconciliation starts before the conflict arises, which means:

- People need to learn how to deal with their own pain and destructive subjective experiences and to reconcile with it.
- Reconciliation means finding ways and methods of cultivating inner peace within each individual from childhood on.
- We see inner peace as a precondition for peace outside oneself / in the world.
- For that reason peace is a basis for all peoples and nations

In this context, we are calling for an ImPact Coalition in which reconciliation and peace are core competencies of World Education. The resulting assured common ground for sustainable peace would entail a new management strategy, introducing reconciliation and peace as core competencies in a new educational system.

Assuming that reconciliation and empathetic perception are indispensable preconditions to get into sustainable peace it is necessary to embody it as core competencies in World Education by UN resolution - see the S.E.R. Foundation's action plan:

Fulfilling:

SDG 3 Good Health and Well-being

SDG 4 Quality Education

SDG 16 Peace and Justice, Strong Institutions,

SDG 17 Partnerships for the Goals

STEP 1:

Conceptualize a curriculum for reconciliation and peace with didactics and methods of empathic perception, teaching and learning for all ages. Create examples, like music projects, collect reconciliation rites worldwide, like “Ho o pono pono“, provide training tools like ERGOSOMA International workshop suitcases for empathy training and perception exercises

STEP 2:

Find Kindergartens, schools, universities, adult education centers, colleges, community centers in your home-country/hometown and ask them to test your method, example within a certain time-frame. Collect these experiences, analyse and evaluate them.

STEP 3:

Submit it to Ministries of Education and /or Governmental Departments. Ask them to build up the general contents on a national level and implement it in its educational system.

STEP 4:

Draw up a “Resolution for Reconciliation and Peace Education“. Sign it with S.E.R. and partners, with politicians, diplomats, celebrities and start lobbying and promoting it in political and diplomatic circles, as well as in entertainment and film businesses, everyday life and private circles.

STEP 5:

Finally find Representatives/Ambassadors of Permanent Missions of supporting countries to the UN, who bring this resolution into the General Assembly to make it mandatory worldwide.

As the S.E.R. Foundation’s credo is Reconciliation and Peace, our highest goal is to establish reconciliation and peace as ideal status:

Sustainable Peace in a world without borders through Reconciliation as core competency in World Education.

For this reason, let us take steps together, so that our core goals can become a reality for a peaceful world.

SHARING for financing reconciliation and peace education as World Vision – Our suggestions for SHARING

Sharing expresses a voluntary act. It takes dignity, the right to live, of basic rights of the other for granted. It stands for joint use of resources.

Sharing as an indicator for peace development and the role of reconciliation:

- **Reconciliation as political dimension to foster global peace and brotherhood**
- **Sharing as highest form of reconciliation**
- **Sharing is a high spiritual, social, ethical value**
- **Sharing to foster humanness in society for sustainable peace, social development and stability**

We propose:

To counteract the existing extremely unbalanced distribution of wealth and to facilitate unconventional actions of the beneficiaries of growth, the S.E.R Foundation proposes - parallel to the measures that the head of states will take –

to launch a *campaign for sharing* within the Summit for the Future for financing reconciliation and peace education as core competencies in World Education

The campaign should be headed by exemplary acting prominent partners especially from policy, businessmen from the financial sector, representatives of leading enterprises, landlords,

granting a considerable part, for instance ten per cent, of their wealth including property, to a fund, run by the UN or appointed experts of government, civil society and NGOs.

Enterprises might also contribute by sharing their profits through converting informal jobs to employment on a permanent basis, reserve a percentage of these jobs for the most disadvantaged groups as youth, women, girls and minorities.

By giving land, people living in rural areas would be enabled to grow plants in order to ensure their livelihood, *ibid*.

A financing of internet access, especially for all women and girls, in remote areas could reduce exclusion through the existing digital divide.

All suggestions above contribute to inner peace of the individual person.

The One hundred (100) richest companies or private men in every country should invest a certain percentage of their fortune in educational, health and reconciliation/peace program to promote reconciliation and peace in World Education.

S.E.R. - WHO WE ARE AND WHAT WE STAND FOR

Founded in Germany in 1996, the S.E.R. Foundation D has been working for Reconciliation and Peace since its very beginning and on reconciliation programs, philosophy and reconciliation diplomacy since its accreditation as UN NGO in 2003, calling out and implementing annual reconciliation weeks, creating an Action Plan for implementing the International UN Reconciliation Year 2009, which the GA declared upon request of the Foundation for Subjective Experience and Research S.E.R. in 2006 and continuing calling for action towards Reconciliation and Universal Peace, awarding best practice examples worldwide, just to mention some of our activities.

Internationally we are known as

“FOUNDATION for SUBJECTIVE EXPERIENCE and RESEARCH S.E.R.”

The FOUNDATION for SUBJECTIVE EXPERIENCE and RESEARCH S.E.R. has a more holistic approach on reconciliation and considers both:

It applauds higher-level diplomatic reconciliation efforts, yet also sees reconciliation as a fundamental principle for human development at all levels of society.

For us reconciliation starts with us as individuals, and is inter-twined and spreads through our families, neighborhoods, communities, and workplaces, with rippling effects and inter-connectedness, as well as direct impact on the well-being of our society at national and global levels.

The FOUNDATION for SUBJECTIVE EXPERIENCE and RESEARCH S.E.R strives to implement the UN Sustainable Development Goals and supports the Summit of the Future Program, especially as said in the Secretary General’s vision for the future “Our Common Agenda”: (9) A new Agenda for Peace and (10) Transforming Education, as well as supporting and providing ways to Global Health.

ERGOSOMA - Who we are and what we stand for:

Ergosoma is a complementary health care method and Ergosoma International has been presenting Best Practice Projects of the ERGOSOMA HEALTH CARE PROGRAM at the CSW for more than ten years now. There are various teachers working internationally, the association is centered in Germany and realizes best practice projects in Public Health and social work.

The significance of health for global change, of a well-balanced state, a profound wellbeing in ourselves uplifts our mind and dignity. It enables us to follow high values whilst taking action. Strengthening the health- and self-perception, self-healing-power and resilience through empathy supports truthful and individual participation creating future policies. Health for Change is therefore the vision - expanding empathic perception and resilience for individuals and civil society.

Suitcase & Training

The ERGOSOMA International Suitcase is a training tool that carries the empathy training and perception exercises worldwide. The Suitcase comes packed with the most effective programs. It can be combined with training programs on specific subjects.

The main target group for ERGOSOMA INTERNATIONAL Suitcase workshops are for professionals, educators, NGO representatives, social workers. However, trainings can also be opened to other interested experts: researchers, students and indigenous practitioners.
